Pray in this direction

May your eyes be open toward this temple night and day, this place of which you said:
My Name shall be there
so that you will hear the prayer your servant prays toward this place.

PHILIPS

SECURED BACKUP CAMERA

Offers increased backup visibility and safety for drivers and pedestrians:

Creates a new level of situational awareness for increased yard safety.

180 degree view allows for visibility of rear bumpers, doors and over 20 feet behind the trailer.

Allows driver to see docking position and alignment to make maneuvering in reverse easier and prevent trailer damage from hard hits.

Protects trailer owner's assets:

Increased visibility decreases accidental damage during backup, avoiding costly repairs and downtime.

Added functionality when paired with a Phillips Connect Bluetooth Device:

Still image uploads to cloud storage when impact or other extreme events are detected.

Functional/Diagnostic information provided to telematics to ensure proper operation and monitor driver usage.

Free iOS application works on any iOS device:

Access to streaming backup camera video for ANY truck driver, regardless of company affiliation.

Adaptive algorithm provides list of available cameras to sync to in most likely order to allow driver to easily find the correct camera when there are many nearby.

<https://apps.apple.com/us/app/asdusa/id1588331742?platform=iphone>

Absolute Stone Design

The image shows a Mac desktop with an Android Studio interface. On the left, there's a preview of an iPhone Xr displaying the 'Absolute Stone Design' app. The app has a dark background with a large 'ASD' logo at the top. Below it, there's a blue rounded button labeled 'Log In', a white rounded button labeled 'Register', and a light blue rounded button labeled 'Sign Out'. At the bottom, there's a navigation bar with icons for Home, Locations, Safety, Contact Us, and Help. On the right, the main Android Studio window displays the code for 'welcome_page.dart'. The code imports various Flutter and Firebase packages and defines a 'WelcomePage' stateless widget. It includes logic for handling platform detection (iOS vs. Android) and building a UI with a navigation bar and a central text area. Two iPhone Xr mockups are shown side-by-side, both displaying the same app interface. To the right of the screens, there's promotional text and logos: 'Absolute Stone Design app' with a Dart/Flutter logo, 'iOS & Android' with an App Store icon, and a Google Play Store logo.
